

# Foundation Failure Signs

## Know the signs before it's too late.

Detecting the signs of foundation problems will not only create a safer environment but may save you money in the long run. Whether you have doors that won't close, drywall cracks, cracks in concrete floors or stair step cracks in brick, understanding these situations will lead you to the source of the problem. ECP is dedicated to providing the most extensive information about structural repair issues and their comprehensive solutions.
