Earth Contact Products: Providing You  
The Very Best Solution for Your Wet Basement

**Designed and Engineered to Perform**

## About Earth Contact Products

For over a decade, Earth Contact Products (ECP) has grown to be the most trusted name for foundation repair and waterproofing products. As patent and trademark holders on over 18 items, we supply the very best products, service and support to our national network of contractors. ECP is dedicated to our contractors and the people they serve, by providing the highest quality products and systems in the industry.

### How Water Enters Your Home

1. Over the Footing
2. Under the Footing
3. Through Floor Cracks
4. Windows & Window Wells
5. Pipe Penetrations
6. Over the Sill Plate
7. Wall Cracks & Mortar Joints
8. Failed or Undersized Pump
9. Damp Air from Humidity
10. Walk-Up Basement

**Note:** It is important that gutters and downspouts are clear of debris, functioning properly and discharging away from home and that all soil and concrete is sloped so that water runs away from structure.

### Other Options (alternative repair methods)

#### Waterproof Paints and Sealants

- Cheap and easy to install
- Traps water inside wall causing more damage
- Not a permanent solution

#### Exterior Waterproofing

- Requires digging up foundation wall
- Can take many days to complete
- Very expensive process

#### Top of Footing System

- Easy for contractor to install
- Allows moisture and soil gases in the home
- Does not remove water from under slab

# The preferred **Solution** for your Home's Wet Basement

The ECP Sealed Drainage System (SDS) is a permanent solution for your home's wet basement. We provide you the very best option to solve your basement water problems for good! The ECP Sealed Drainage System is an interior water management system that is installed under your floor, around the perimeter of your basement in the affected areas. The water is then directed through the system to the ECP Sealed Sump System for discharge.

- Sealed System = Healthy Basement
- Permanent, Cost Effective Solution
- Removes All Water, Even Under Slab
- The Right Choice!

## **Sump System**

- Clear, Sealed Lid
- Dual Float Switch for Added Flood Protection
- Powerful, Energy Efficient Pumps
- Bell Shaped Design for Increased Volume

## **Drainage System**

- Allows Cold Joint and Wall Drainage
- Higher Volume Drain Pipe Placed Next to Footing
- Washed Stone to Filter Sediment
